

APEX

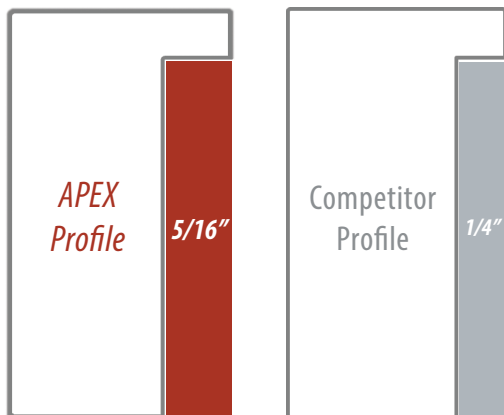

Apex is a new collection of 8 deep shadowbox style mouldings with an inside depth of 1 7/8" allowing for framing a wide range of three-dimensional projects, works on canvas, and traditional 2-dimensional work. The geometric profile lends itself to the popular modern art and interior design trends of today.

FLOATMATE™

Apex Collection mouldings make ideal *FloatMates*. Paired with Omega Floater 83541 (1" depth, or 1 3/8" depth turned 90°), Apex mouldings can be used to create attractive floater frames. Adding the height of the lip, float depths increase to 1 1/4" to 1 5/8" respectively.

Shown: Apex 83703 paired with floater 83541

Broader Rabbets=Broader Utilization

Bigger is better when you need room to create. Apex rabbets are 5/16" wide, big enough to hide spacer and shadowbox edges. Have a thick matboard/foamboard combo shadowbox? Apex has you covered.
