△ Orion mouldings are designed with the added ability to construct stacked frames for designers to customize and create harmonious color compositions.

## ORION™

Orion is a collection of 6 mouldings featuring sharp geometric silhouettes in 3 classic metallic finishes of gold, silver, and pewter. The collection's signature detail is its surface, speckled with glaze to create a mottled texture, then covered with leaf and rubbed to create delicate shimmering highlights sprinkled throughout the brushed panel.

### ◁ Photo Finish

Orion's neutral finishes of silver and pewter bring out a warmth and depth to black & white and vintage silver print photography. Employing metal finishes where opaque black, white, or grey mouldings are commonly used can bring neutral compositions to life by introducing light.
