STRATUS™

The Stratus Collection is a modern classic, with a range in framing solutions for 20th-Century art genres such as art-deco, modernist, and pop art, to photography, graphic prints and more.

Stratus combines two significant features to achieve one striking look. The hammered texture is the most distinct detail of this collection, creating delicate reflections upon its lustrous finishes. The metallic patinas are refined by hand-layered wax, giving an alluring soft luster to the overall palette of the collection.
